2014
School of Engineering and Applied Science
Distinguished Service Award
(Vickie Faulconer)

The Distinguished Service Award is given periodically to honor individuals who have given generously of their time and talent to the School of Engineering and Applied Science and/or the University of Virginia Engineering Foundation. This year we are awarding the Distinguished Service Award to Vickie Faulconer.

- Vickie joined the University in 1991 and has contributed over 22 years of outstanding service to the Department of Chemical Engineering.

- As administrative assistant to the chair she has enriched the experience for over 1,000 undergraduates, 270 graduate students, 40 faculty and 25 staff members.

- Her professional and friendly manner and her large network of contacts helps her play a critical role in department activities. In fact, she is considered the face of Chemical Engineering and is the lynchpin of most departmental activities.

- She is considered a leader, full of motivation and determination and yet always has a sense of humor and positive energy.

- Among other achievements, she has played a critical role in support of faculty hiring processes and other human resources issues. She trains staff on U.Va. systems, organizes seminars, helps promote student employment, organizes graduate teaching assistant roles and serves as the undergraduate and graduate coordinator.

- For this and more, we wish to award the 2014 Distinguished Service Award to Vickie Faulconer.
