Congratulations

Most Highly Cited Authors

John C. Bean
John Marshall Money Professor in the Charles L. Brown Department of Electrical and Computer Engineering

John A. Stankovic
BP America Professor of Science and Technology in the Department of Computer Science

Edgar A. Starke Jr.
University Professor and Oglesby Professor of Materials Science and Engineering

Honored by
Thomson Scientific’s Institute of Scientific Information

For their significant and prolific contributions to the advancement of research literature in their fields

Top to bottom: John C. Bean, John A. Stankovic and Edgar A. Starke Jr.
Most Highly Cited Authors

John C. Bean, John Marshall Money Professor in the Charles L. Brown Department of Electrical and Computer Engineering; John A. Stankovic, BP America Professor of Science and Technology in the Department of Computer Science; Edgar A. Starke Jr., University Professor and Oglesby Professor of Materials Science and Engineering, are recognized by Thomson Scientific’s Institute of Scientific Information as among the 250 most highly cited authors in their fields worldwide.

The Highly Cited Authors list identifies the top 250 researchers in each of 21 research fields in the life sciences, medicine, physical sciences, engineering and social sciences whose published works are cited the most often within a specific time period.

Bean’s research focuses on the extension of silicon device physics through heterostructure devices, specifically germanium silicon MBE and its physics and applications. Stankovic’s research subject matter includes real-time computing, embedded computing, operating systems, wireless sensor networks and large-scale distributed computing. Starke was recognized for his significant research in the mechanical behavior of materials and alloy development.
