

U. Va. ENGINEERING

CONGRATULATES

National Academy of Engineering Member

John L. (Jack) Hudson

Wills Johnson Professor of Chemical Engineering

HONORED BY

The National Academy of Engineering

For advances in the understanding and engineering of
complex dynamic chemical reaction systems

John L. (Jack) Hudson

National Academy of Engineering Member

National Academy of Engineering (NAE) membership honors those who have made outstanding contributions to “engineering research, practice or education, including, where appropriate, significant contributions to the engineering literature” and to the “pioneering of new and developing fields of technology, making major advancements in traditional fields of engineering or developing/implementing innovative approaches to engineering education.”

Professor Hudson was selected for membership for his advances in the understanding and engineering of complex dynamic chemical reaction systems. He joins 11 other NAE members at U.Va.’s Engineering School. For a list of SEAS NAE members, visit www.seas.virginia.edu/nae.php.

A member of the U.Va. faculty for more than 30 years, Hudson leads researchers in the Engineering School’s Department of Materials Science and Engineering, the College of Arts & Sciences’ Department of Biology, and the School of Medicine, as well as in other universities and laboratories throughout the United States and abroad.
